

Timely Intervention, Real Results

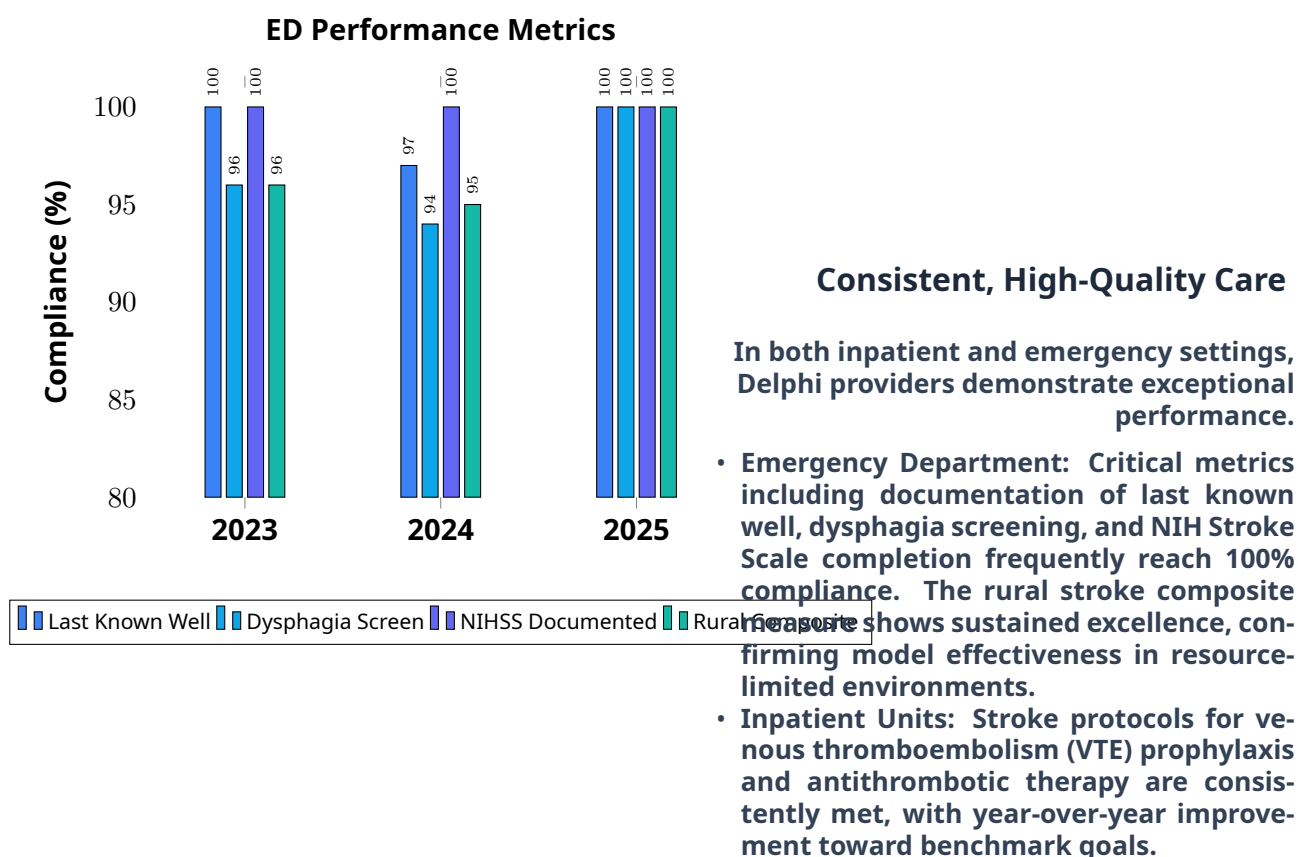

A model for High-Quality Stroke Care

**Delphi White Paper
October 16, 2025**

Executive Summary

Stroke care is one of the most critical services a hospital can provide. Timely, evidence-based intervention can dramatically improve outcomes, reduce long-term disability, and save lives. Delphi’s clinical teams consistently deliver high-quality stroke care across both rural critical access hospitals and larger regional medical centers—meeting and exceeding national benchmarks in every setting. This white paper analyzes performance data from these diverse environments, demonstrating the scalability and reliability of Delphi’s clinical model.

Rural Critical Access Hospital: Sustained Excellence

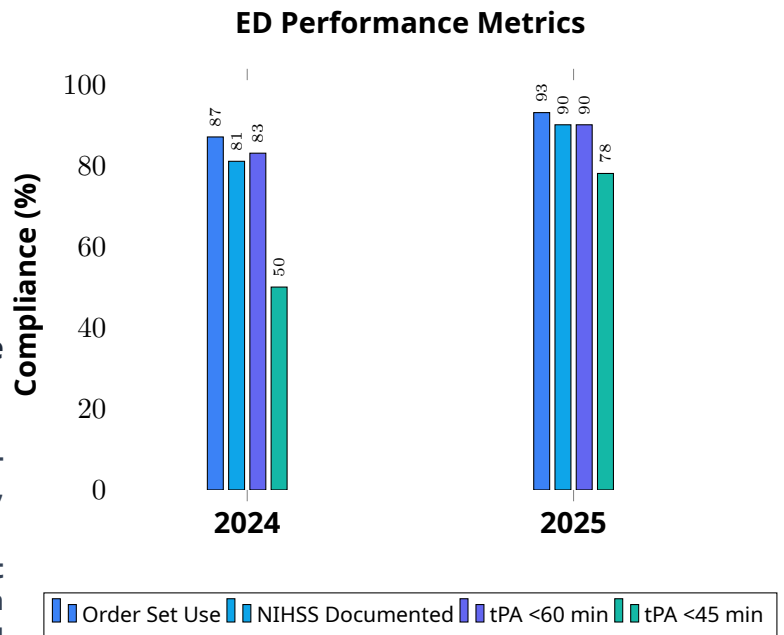

Regional Medical Center: Excelling at Volume

Standardized, Guideline-Driven Care

In a higher-volume ED, Delphi teams continue to excel by focusing on standardized, time-sensitive care.

- **Process Improvement:** Stroke order set utilization has increased steadily from 87% in 2024 to 93% in 2025, supporting guideline-driven care.
- **Time-to-Treat:** Performance on time-sensitive thrombolytic therapy metrics shows consistent improvement, with treatment windows within 60 and 45 minutes trending upward year-over-year.

Why This Matters: The Strategic Impact

- **Time-Critical Care Saves Brain:** Every minute saved in stroke treatment can preserve millions of neurons and dramatically improve a patient's potential for recovery. Delphi's focus on rapid assessment and intervention is central to our clinical philosophy.
- **Measured for Excellence:** Hospitals are measured, accredited, and reimbursed based on stroke metric performance. Consistently high scores impact public reporting and a hospital's reputation as a center of excellence.
- **A Scalable and Reliable Model:** Delphi's stroke care performance reflects our commitment to clinical excellence and operational discipline. Our ability to meet and exceed benchmarks across diverse hospital environments—from rural EDs to regional centers—positions us as a trusted partner in delivering life-saving care.
